

A warm, cozy winter scene. In the background, a fireplace with a warm fire. In the foreground, two dark mugs sit on a wooden surface next to a thick, light-colored knitted blanket. A semi-transparent white rectangle is centered over the image, containing the text 'Stay Warm' in a red script font, with a red scarf graphic integrated into the letter 'W'.

*Stay
Warm*

How it works

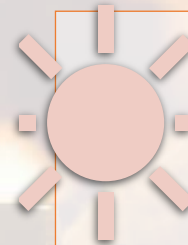

If you wish to set a specific temperature: set it through your app.

Set a threshold on expenses: if you exceed it you'll receive a notification from the app.

Heat is turned automatically on from **8am** to **8pm** on ground floor (**21°C**).

Heat is turned automatically on from **8pm** to **8am** on first floor (**23°C**).

Automatically turns boiler on if someone is coming home in **30** min or less.

What you will need

In your home

- Our boiler, with an internal clock
- Thermostats and radiators
- Presence sensors

With you

- StayWarm app with access to GPS info
